

Procurement Code Exemption

Electric System Procurement Exemption - Purchase or Sale of Electric Energy, Electric Generation Capacity, Electric Transmission Capacity and Transmission Services - Short Term and Long-Term Transactions

Scope of Procurement Exemption: Purchase or Sale of electric energy, electric generating capacity, electric transmission service capacity and their associated ancillary services, or resale of transmission capacity retained from transmission service providers in the open transmission or open transmission markets or third party transmission providers, or the purchase or sale renewable energy credits (also known as Greentags).

Enabling Agreements

Enabling Agreements set out the framework for how capacity, energy, third party transmission and renewable energy credits are purchased and sold between JEA and other companies. Enabling Agreements are executed prior to any business being conducted with TEA, other utilities, marketers or any third party transmission provider. JEA has established Enabling Agreements with The Energy Authority (TEA) for the purchase and sale of capacity, energy, 3rd party transmission service and renewable energy credits; with other Florida utilities for emergency purchase and sales; with third party transmission service providers. A signature is not required for TEA standard transactions less than \$10,000,000, however, a signature is required for an Indemnity Agreement for TEA transactions > \$10,000,000.

Transactions

Transactions are defined as the financial arrangement of the transfer of capacity and/or energy and/or renewable energy credit from one party to another including any applicable third party transmission services. This may also include the physical flow of electricity from one party to another. A renewable energy credits, or Greentag, is a market-based instrument that represents the property rights to the environmental, social and other non-power attributes of renewable electricity generation. Greentags are issued when one megawatt-hour (MWh) of electricity is generated and delivered to the electricity grid from a renewable energy resource.
