Earn Rebates When You Upgrade and Save

BUSINESS REBATE PROGRAM

OVERVIEW

Energy and water efficiency upgrades make smart investments. The JEA Business Rebate Program offers rebates designed to help you make those efficiency upgrades at a lower initial cost.

The Business Rebate Program helps electric and water business customers replace aging, inefficient equipment and systems with efficient technologies. Through financial rebates and technical assistance, our program provides the right mix for you.

BENEFITS FOR YOUR BUSINESS

- ✓ Efficient technologies reduce your energy and water use and minimize costs.
- ✓ Investments in energy and water efficiency reduce both greenhouse gas emissions and water waste, which helps the environment and your local community.
- ✓ Energy and water-efficient equipment can streamline operations, enhancing workplace productivity and improving employee comfort.

SOLUTIONS THAT FIT

The Business Rebate Program offers rebates for both electric and water measures.

ELECTRIC REBATE OPTIONS

- Lighting
- HVAC
- Refrigeration
- Water Heaters
- Cool Roof and Window Film
- Custom

WATER REBATE OPTIONS

- Cooling Towers
- Restroom Equipment
- Smart Irrigations Controllers
- Ice Machines
- Kitchen Equipment

IMPORTANT REMINDERS

- Most projects require pre-approval prior to ordering, purchasing or installing equipment. Please check program requirements with the JEA Business Rebates Program team.
- Commercial electric customers may receive up to \$100,000 per program year for eligible efficiency upgrades. Commercial water customers are also eligible for up to \$100,000 for water-efficiency measures. These caps apply per customer based on their federal tax ID.
